

IO 100

I/O extension module

16 digital inputs

16 digital inputs/outputs, individual configuration

PROFILE

The IO 100 is part of the P-open series and provides compact I/O extension for the PU 100 range of PLCs. The unit features 16 on-board digital inputs, and 16 digital I/O which can be configured individually as inputs or outputs.

With its compact dimensions of 124 x 170 mm, and a depth of 85,5 mm, the IO 100 is ideally suited for mounting close to the process in de-centralized systems.

The housing is designed for clip-on mounting to standard DIN rails. System extensions are easily implemented by connecting the IO 100 to its master PLC (PU 10x) via a cable which plugs into the module's extension bus (E-bus). See the specifications of the relevant PLC module for the max. possible number of extension I/O.

Selective I/O energization

Supply of the inputs/outputs is provided via the connecting terminals at the signal level. The supply voltage is 24 VDC.

The I/O's can be divided into 6 groups, each with its own supply. This enables the I/O of a specific group to be disabled by means of an external switching device.

Convenient field connections

Electrical wiring from the machine or process is taken directly to the terminal strips at top and bottom of the modules. The terminal strips are of the plug-in type, allowing system pre-wiring as well as fast module exchange.

Furthermore, the following alternatives are available for the terminal strips:

- Screw terminals
- Screwless spring-clamp terminals
- Crimp terminals.

Inputs/outputs are connected using the 3-wire principle. Front panel LEDs indicate the signal status of every I/O, and the module's operational status. The LED positions are directly associated with the corresponding I/O's.

Inscription labels on the terminal strips allow clear identification of each I/O.

TECHNICAL DATA

Configuration

Pre-configured

Digital I/O

16 digital inputs for 24 VDC.

16 digital I/O, individually configurable as 24 VDC inputs/outputs (max. 0,5 A for outputs).

Connection: 3-wire technique

All digital outputs are short-circuit proof and have reverse-polarity protection.

Status LEDs / diagnostics

32 red LEDs show the switching status of the digital I/O.

Interface

E-bus

For connection to the master PLC.

POWER SUPPLY

Module supply

24 VDC, max. 0,15 A (to EN 61 131-2)

I/O energization

24 VDC (to EN 61 131-2), divided into 6 groups

Galvanic isolation

Between module electronics and digital I/O

ENVIRONMENTAL CONDITIONS

Permissible temperature

For operation: 5...50°C

Climatic category

KUF to DIN 40 040

Relative humidity: $\leq 85\%$ yearly average, no condensation

Shock and vibration

Vibration test Fc

to DIN 60068-2-6 (5...50 Hz)

Unit in operation: 1g or 0,075 mm

Unit not in operation: 1,5g or 0,15 mm

Shock test Ea

to DIN IEC 60068-2-27 (15g, 11 ms)

ELECTROMAGNETIC COMPATIBILITY

Electromagnetic immunity

Complies with EN 50 082-2

Electromagnetic radiation

Complies with EN 50 081-2

GENERAL

Housing

Front dimensions: 124 x 170 mm

Depth: 85,5 mm

Module spacing: B = 113/118,5 mm

Protection mode: IP 20

CE-marking

Fulfils the European Directives for electromagnetic compatibility and low voltage.

Electrical connections

Choice of screw terminals (Phoenix type FRONT-MSTB 2,5/18-ST-5,08), screwless spring-clamp connection, or crimp terminals.

All terminal types simply plug onto the connector strips of the IO 100.

Electrical safety

Tested to IEC 348 (VDE 0411)

Protection class III (protective low voltage)

Mounting method

Clip-on rail mounting (NS 35/7,5 „top-hat“ rails to DIN EN 50 022)

Weight: approx. 0,49 kg
